TWO-STEP PROBLEM

WHAT IT MEANS:

A word problem that needs **TWO** math steps to solve

—■ DRAW IT HERE

Write: what are the 2 steps in Laila's problem?

📌 A two-step problem has ____ things that happen in the story.

STEP 1

WHAT IT MEANS:

The **FIRST** thing that happens **Solve this equation first!**

—■ DRAW IT HERE

Write the Step 1 equation for Laila's stamps

📌 In Laila's problem, Step 1 is: $14 \text{ } ___ \text{ } 3 = ___$.

STEP 2

WHAT IT MEANS:

The **SECOND** thing that happens **Start with Step 1's ANSWER!**

—■ DRAW IT HERE

Write the Step 2 equation for Laila's stamps

📌 Step 2 starts with ____'s answer (NOT the original number!)

Math Vocabulary

Two-Step Word Problems • Page 2 of 2 • Words 4–6: Uses/Spends • Show Your Work • Final Answer

Name: _____ Date: _____ Vocab Book p. _____

USES / SPENDS

WHAT IT MEANS:

Signal words that mean **SUBTRACT** — take away from the total

— DRAW IT HERE

Circle: adds or subtracts? 'She uses 5 stamps'

When the problem says 'uses 3', I _____ 3.

SHOW YOUR WORK

WHAT IT MEANS:

Write **BOTH** equations clearly so the teacher can see each step

— DRAW IT HERE

Write out both equations for Laila's problem!

For two steps I write _____ equations total.

FINAL ANSWER

WHAT IT MEANS:

The result after **ALL** steps are completed — the last number

— DRAW IT HERE

Solve: $14 - 3 = \underline{\quad}$ then $\underline{\quad} - 5 = \underline{\quad}$ → final answer = _____

After Step 1 and Step 2, the final answer is _____ stamps.
